

City of Taylor Mill

est. 1957

January 28, 2016

Resident of Taylor Mill,

Between the months of February and May, Duke Energy Kentucky, Inc. will be performing inspections on gas metering equipment and piping located inside buildings throughout the City. These inspections are required by the U.S. Department of Transportation (DOT) and are necessary for safe and natural gas pipeline operations.

The inspections involve the gas piping from the building wall to the outlet of the gas meter. The work to be performed will include an inspection of the exposed gas piping and metering equipment for leakage and corrosion. On average, an inspection should take approximately ten minutes to complete.

Inspections throughout Taylor Mill, both business and residential, will be performed by Southern Cross Inc. Please be advised that the Southern Cross Inc. technician will be readily identifiable by:

- Wearing a visible Southern Cross Inc. picture ID on the outside of the uniform; and
- Having a contact phone number for the customer to call for verification of the Duke Energy Ohio inspection.

Southern Cross Inc. technicians will be driving a Southern Cross Inc. or personal vehicle with a Southern Cross Inc. logo, so you should not expect to see the technician in a Duke Energy vehicle.

If you would like more information on these inspections, please visit: <http://www.duke-energy.com/kentucky/natural-gas/inside-piping.asp>.

Please do not hesitate to contact the Taylor Mill City Administration Office at 859-581-3234, should you have any questions or concerns.

Thank you,
